

Bat and Rabies Safety for People and Pets

1. Report any sick or dead bats immediately to the City of Moorpark Animal Control at 805-517-6267. If that office is closed, please contact Ventura County Animal Control Services at 805-388-4341, and then press #2.
2. Make sure all cats and dogs over four months of age have current rabies vaccinations and license all cats and dogs within 30 days. (It's the law!)
3. Examine your residence for bats living around the home, especially under the edge of second story roof tiles along the perimeter of the house. If bats are found, consult pest/wildlife removal companies or local wildlife rescues regarding removal by exclusion, and for any necessary cleanup. If you see bats emerging from a neighboring home, it should be reported to Moorpark Animal Control at 805-517-6267.
